Contact Name:

Delivery Address:

1. Telephone Number of the line / mobile / cell / phone that the unit will be/is connected to.

Network.

Tel No.

2. Auto Cancel feature.

Do you want the unit to auto cancel at the end of the roster? (Stop dialing after the last number)   YES ☐   NO ☐

3. Unique Station Identification. (Currently a maximum of 31 characters)

Station Identification
(This should be unique e.g. Windsor Landfill SL5 0DP)

4. Telephone Numbers to be called (Normally Duty Rosters - Complete only as many as required).

Roster 1

Dial-out	ID e.g Jack's home		Pause		Number		Type (speech/sms/pager/data)	
First								
Second								
Third								
Forth								
Fifth								

Pause – is the time required from the end of one dial-out to the start of the next - the default is 2 minutes.

Roster 2

Dial-out	ID e.g Jack's home		Pause		Number		Type (speech/sms/pager/data)	
First								
Second								
Third								
Forth								
Fifth								

Pause – is the time required from the end of one dial-out to the start of the next - the default is 2 minutes.

Roster 3

Dial-out	ID e.g Jack's home		Pause		Number		Type (speech/sms/pager/data)	
First								
Second								
Third								
Forth								
Fifth								

Pause – is the time required from the end of one dial-out to the start of the next - the default is 2 minutes.

5. Emergency Roster

An Emergency roster is a special roster that is permanently linked to a single channel / input
E.g. Your fire alarm is linked to channel 1 and you want it to phone the fire brigade.

Emergency Roster

Dial-out	ID e.g Jack's home		Pause	Number		Type (speech/sms/pager/data)	
First							
Second							
Third							
Forth							
Fifth							

Pause – is the time required from the end of one dial-out to the start of the next - the default is 2 minutes.

Indicate below the channels you wish to initiate the above Emergency Roster (all other channels will initiate the current Duty Roster as per normal.

1	2	3	4	5	6	7	8
☐	☐	☐	☐	☐	☐	☐	☐

6. Station Identification Number – (this is only applicable to Model 20 and MM20 units <u>without</u> real speech cards).

This allows you differentiate between multiple units in the field. (The default is 1) [＿＿＿＿]

7. How many inputs does your unit have?

4 ☐ **8** ☐ **16** ☐ **32** ☐ **56** ☐ **Other** ☐

8. Input & Extended Pause Delays

Input Delay - What is the approximate time period you require from an input occurring to the unit to start dialing out?
(The default is 60 seconds & the maximum is 40 minutes)

[＿＿＿＿] Seconds / Minutes

If you would like to have different input delays on your various channels please indicate them below, otherwise they all will be set as above.
